Change Management

Growth, ROI, & Sustained Transformation

AI

AI Powered Automations

- We deliver unique solutions with advance machine learning and AI capabilities that directly addresses customer needs:
 - Optimized adaptive templates
 - Automated schedule grooming
 - Coupled appointment management
 - Daily staffing assignments with balanced acuity
 - Forecasted staffing demand
 - Labor optimization

Integrated Workflows

- Our team of data experts reduces hospital IT resource strain by:
 - Quality testing and scrubbing your raw data
 - Training
 - Providing ongoing support
- Reduction of “garbage in, garbage out” to ensure accuracy of analytics and templates.
- iQueue refines data for accurate patient journey insights and enables continuous improvement.

Change Management

- Comprehensive training for all end users -beyond implementation including any feature upgrades to enable process changes
- Continuous touch points to ensure you are meeting your operational KPIs
- Dedicated customer success and lean process teams that identify areas for workflow optimization
- Partners in innovation -ie. infusion best practices, benchmarking

Unlike other technology companies, including EHR vendors, LeanTaaS provides a comprehensive suite of services and technology solutions, including AI/ML-based software tools and the expertise of leading healthcare digital transformation specialists, to deliver guaranteed healthcare optimization. This is backed by a dedicated team that works closely to ensure successful implementation, change management, supplemental ad-hoc reporting, training, and ongoing value realization from LeanTaaS' iQueue for Infusion Centers.
